Y/ref : **Khursaniyah Al Fadhili - D43-K-1801 -**
O/ref **: D41104 quotation number 3**

In response to your inquiry referenced above, we are pleased to confirm our quotation as follows :

ITEM A 1 : **Flender Graffenstaden** (FG) High Speed increaser, model ***TX50/4C***

- *Rating conditions :* Rated power at ***6800 kW***
  Driven by a electric motor at ***1800.0 rpm*** (specified : 1800.0 rpm)
  Driving a centrifugal compressor at ***7309.1 rpm*** (specified : 7285.0 rpm)
  Service factor ***1.45*** according to ***API613/03*** (required : > 1.4)

- *Technical description :* Double helical
  Manufacturing according to API standard
  Flange on LS shaft end
  Flange on HS shaft end
  Estimated Weight : 4000 *kg*

- *Bearings description :* 2 cylindrical bearings on LS shaft
  2 offset bearings on HS shaft
  1 double acting tilting pad thrust bearing on low speed shaft non driven end

- *Mechanical running test :* Full speed, no load test during 4 hours according to the API 613 5th Edition standard.

- *Lubrication conditions :* 164 l/min of Oil ISO VG 46 at 60°C and 2.5 bar at inlet (calculated values only)

- *Miscellaneous:* Efficiency at full load : 99.03 %
  Power losses at full load : 66 kW (calculated value only)
  Anticipated Sound Pressure Level: 82.0 ± 2dB(A) at 1 meter

Base price : ***117 900 EUR*** each gear box
Delivery time : ***36 weeks*** after the FG acknowledgement of the order
Quantity : ***8 gearboxes***

FLENDER-GRAFFENSTADEN S.A., FRANCE
BP 84, F-67402 ILLKIRCH-CEDEX
1, rue du Vieux Moulin
F-67400 ILLKIRCH-GRAFFENSTADEN

Comments :

- Coupling data taken into account on HS Shaft:
  - Weight: 26.6 kg
  - Center of gravity position from shaft end: 30.9 mm
  - Inertia: 0.266 kgm^2
- Coupling data taken into account on LS Shaft:
  - Weight: 87.5 kg
  - Center of gravity position from shaft end: 40.9 mm
  - Inertia: 0.875 kgm^2

Including :

- Customer witness of test
- After test disassembly and inspection
- Noise level test report
- Lateral analysis undamped
- Documentation : downloadable electronic file in english

Instrumentation *(see the complete package on additional technical data sheet):*

- *Temperature package*
  12 RTD's PT100 Duplex 3 wires from Thermo Electric Company Inc.
  (2 per bearing and thrust bearing side) not wired with terminal heads..... Price included
- *Bently Nevada vibration package*
  8 radial (4 per shaft) & 2 axial (on LS shaft) vibration probes, 2 accelerometers (1 per shaft), 2 keyphasors (1 per shaft) not wired ..... Price included

Spare parts *(Prices are net valid only if spares are ordered together with the gearbox):*

- *Commissioning Spares*
  2 RTD's, 2 BN vibration probes, 2 BN accelerometers ..... 7 900 EUR Lot Net
- *2 Years Normal Operation Spares*
  2 set of bearings with RTD's, 1 set of oil seals ..... 48 420 EUR Lot Net
- *Strategic Spare Parts*
  One complete set of rotating elements consisting of one pinion and one gear.
  Tested if ordered together with the main gearbox according to API613/03
  Full Speed, No Load, with Test Report..... 51 500 EUR Lot Net
- *Container for horizontal spare rotors storage* painted according FG standard..... 17 100 EUR Lot Net

(Specify) _____

NOTES : _____

During start-up, gears can exhibit a transient spike reading of vibration levels that will exceed shutdown settings. Therefore a trip multiplier is recommended in the control system.

Mechanical running test duration 4 hours including
- Shaft vibration record using job vibration probes if ordered
- Bearings temperature records
- Casing vibration measurement
- Sound level pressure measurement
- Power losses measurement at oil outlet
- Performed with oil ISO VG 32

Oil flow requirement and power losses are calculated values only, add normal safety margins for sizing heat exchangers.

***Y/ref :* Khursaniyah Al Fadhili - D43-K-3801 -**
***O/ref* : D41104 quotation number 3**

ITEM B 1 : **Flender Graffenstaden** (FG) High Speed increaser, model ***TX40/5C***

- *Rating conditions :*
  Rated power at ***1620 kW***
  Driven by a electric motor at ***1800.0 rpm*** (specified : 1800.0 rpm)
  Driving a centrifugal compressor at ***10737.9 rpm*** (specified : 10736.0 rpm)
  Service factor ***1.47*** according to ***API613/03*** (required : > 1.4)

- *Technical description :*
  Double helical
  Manufacturing according to API standard
  Flange on LS shaft end
  Flange on HS shaft end
  Estimated Weight : 1900 *kg*

- *Bearings description :*
  2 cylindrical bearings on LS shaft
  2 tilting pads bearings on HS shaft
  1 double acting tilting pad thrust bearing on low speed shaft non driven end

- *Mechanical running test :* Full speed, no load test during 4 hours according to the API 613 5th Edition standard.

- *Lubrication conditions :* 64 l/min of Oil ISO VG 46 at 60°C and 2.5 bar at inlet (calculated values only)

- *Miscellaneous:*
  Efficiency at full load : 98.70 %
  Power losses at full load : 21 kW (calculated value only)
  Anticipated Sound Pressure Level: 82.0 ± 2dB(A) at 1 meter

Base price : ***103 850 EUR*** each gear box
Delivery time : ***36 weeks*** after the FG acknowledgement of the order
Quantity : ***1 gearbox***

FLENDER-GRAFFENSTADEN S.A., FRANCE
BP 84, F-67402 ILLKIRCH-CEDEX
1, rue du Vieux Moulin
F-67400 ILLKIRCH-GRAFFENSTADEN

Comments :

- Coupling data taken into account on HS Shaft:
  - Weight: 10.4 kg
  - Center of gravity position from shaft end: 28.2 mm
  - Inertia: 0.104 kgm^2
- Coupling data taken into account on LS Shaft:
  - Weight: 26.4 kg
  - Center of gravity position from shaft end: 30.9 mm
  - Inertia: 0.264 kgm^2

Including :

- Customer witness of test
- After test disassembly and inspection
- Noise level test report
- Lateral analysis undamped
- Documentation : downloadable electronic file in English

Instrumentation *(see the complete package on additional technical data sheet):*

- *Temperature package*
  12 RTD's PT100 Duplex 3 wires from Thermo Electric Company Inc.
  (2 per bearing and thrust bearing side) not wired with terminal heads..... Price included
- *Bently Nevada vibration package*
  8 radial (4 per shaft) & 2 axial (on LS shaft) vibration probes, 2 accelerometers (1 per shaft), 2 keyphasors (1 per shaft) not wired ..... Price included

Spare parts *(Prices are net valid only if spares are ordered together with the gearbox):*

- *Commissioning Spares*
  2 RTD's, 2 BN vibration probes, 2 BN accelerometers ..... 7 900 EUR Lot Net
- *2 Years Normal Operation Spares*
  1 set of bearings with RTD's, 1 set of oil seals ..... 26 010 EUR Lot Net
- *Strategic Spare Parts*
  One complete set of rotating elements consisting of one pinion and one gear.
  Tested if ordered together with the main gearbox according to API613/03
  Full Speed, No Load, with Test Report..... 37 100 EUR Lot Net
- *Container for horizontal spare rotors storage* painted according FG standard..... 15 850 EUR Lot Net

(Specify)

NOTES :

During start-up, gears can exhibit a transient spike reading of vibration levels that will exceed shutdown settings. Therefore a trip multiplier is recommended in the control system.

Mechanical running test duration 4 hours including
- Shaft vibration record using job vibration probes if ordered
- Bearings temperature records
- Casing vibration measurement
- Sound level pressure measurement
- Power losses measurement at oil outlet
- Performed with oil ISO VG 32

Oil flow requirement and power losses are calculated values only, add normal safety margins for sizing heat exchangers.
